

What to do in a fire: transcript

Transcript

Girl: If there were a fire what would we do?

Narrator: Well the first thing to do is remember to stay calm. Before opening any door in a fire first feel the bottom of the door with your hand and work your way up the door to see if it is hot. A hot door may mean that there is fire on the other side. And if it's hot try to get out another way. The greatest mistake people make in a fire is forgetting to crawl low under the smoke. Standing up while trying to escape will put you in a smoke cloud, filled with dangerous gases and make it hard to see. The higher you are the hotter it is, so staying low in a fire is the way to go.
